DETAILED ACTION

Allowable Subject Matter

1. Claims 1-21 are allowed. The following is an examiner's statement of reasons for allowance:

The closest prior art of record is Dai (US 6,922,890). Dai substantially teaches the method of the claimed invention, including positioning sliders 18 on an adhesive surface 28, placing a protective film 16 on the slider, binding the slider in a matrix 14, performing an air-bearing patterning step ("selected process"), and removing the protective film and matrix material via solvent application (NMP) (Figures 4-7 and Columns 6 and 7). However, one of ordinary skill in the art at the time of the invention would not have found it obvious to form the protective film as a liquid solution of a solvent and polyvinyl alcohol in light of the specific method of Dai. In particular, the method of Dai comprises a heating step in which an outer thermoplastic layer 14 melts and pushes down into the chemically inert polymer film 16 (best depicted in Figure 7); thus, the use of a liquid solution as noted above is not consistent with the disclosed method of Dai.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
